

Kofax SignDoc

Want E-Signature Features You'll Actually Use? Sign Here.

When it comes to e-signature solutions, you can buy big, and end up paying for features you'll never use, or you can buy smart and get the capabilities you need to meet all your performance goals:

- **Get started now:** Easy SaaS deployment with an unlimited number of users
- **Reduce operational costs:** Decrease paper usage for print-ship-scan processes
- **Speed time to closure:** Cut time needed to complete contracts or approvals from days to minutes
- **Improve customer satisfaction:** Transform your customer experience using the communications channel of their choice—on any device, anytime, anywhere
- **Stay compliant:** Improve compliance by providing a traceable, end-to-end audit trail of all process steps and transactions
- **Operate securely:** Mitigate risk of external or internal fraud attempts and help avoid litigation
- **Deploy your way:** Subscription, private cloud, on-premises

Trust Matters! Leading Companies Rely on Kofax SignDoc®

Organizations worldwide in banking, insurance, healthcare, manufacturing, retail and many other industries rely on Kofax SignDoc for easy and secure digital transactions.

SignDoc offers the benefits of trustworthy and convenient paperless signing for a wide variety of functions including customer and employee onboarding, procurement, account management, service documentation, payroll and finance.

KOFAX

PRODUCT SUMMARY

Give customers the e-signature experience they want with SignDoc, a secure, flexible solution

Create Signature Documents With Ease

SignDoc makes it easy to transform almost any document into a signature agreement. Choose from a wide range of signature inputs and signing methods. Follow the status of your documents and use automated reminders to keep things moving.

- **Multiple input fields**, such as signature boxes, text boxes, radio buttons, check boxes.
- **Signing options**, including hand-written, click-to-sign, signature image and stamp image.
- **Create and sign with one vendor.** SignDoc is integrated with Kofax Power PDF™, allowing signing elements to be added directly within the PDF-creation environment.

Maintain Compliance And Trust

E-signature trust is based on verified signers and a digital transaction history, backed by regulations across the globe. SignDoc brings confidence to all signing parties and simplifies your compliance process.

- **Lower the risk of compliance issues.** SignDoc complies with key e-signature regulations such as US ESIGN and UETA, and EU eIDAS.
- **Include audit trails automatically**, self-contained with every document, for all parties. No additional, manual steps or need to manage a separate document.
- **Ensures trust** through multiple authentication methods, including email, access codes, SMS and third-party certification.

Simplify The Signing Process

Sign in any type of meeting, at any location, on any device. SignDoc supports all signing scenarios and helps signers execute documents easily. Advanced signing features help navigate more complex signing processes.

- **Guided signing** makes it easy for signers by pointing to items such as initials, signatures, check boxes, etc.
- **Delegate signing** reduces delays by allowing a designated signer to delegate the signing request to another individual.
- **Stage signing** defines groups and allows any user from a defined group to sign at a defined stage.

Seamlessly Integrate E-Signature

Add value to your applications and improve the productivity of users with seamless integration of e-signature within your web, mobile and desktop applications.

- **Maintain your user experience** with fully customizable signing workflows, not the pre-defined snippets other e-signature vendors offer.
- **Your brand comes first**, with your look and feel, up to and including 100% white labeling.
- **Part of your processes.** Extensive APIs integrate the e-signature and signature verification process with your business processes.

Note: Capabilities may vary between cloud and on-premises deployment methods.

How SignDoc Can Help Your Business

Banking

- Account opening
- Consumer loans
- Wealth and asset management

Insurance

- Applying for life and other forms of insurance

Telcom

- Initiating mobile, cable and broadband services
- Accelerating activations

Healthcare

- Patient consents
- Authorize physician credentials
- Healthcare provider agreements

PRODUCT SUMMARY

SignDoc is an Integral Part of Workflow Transformation

Signatures often mark the beginning or the end of a larger workflow. Electronic signatures transformed the signing process, delivering greater efficiency,

lower costs and a better customer experience. But what about the rest of the workflow? Companies that achieve digital success recognize the value of transforming end-to-end workflows. They go beyond e-signatures to capture

and comprehend documents, orchestrate human and automated tasks, and understand what is happening throughout the workflow.

SignDoc and TotalAgility

In addition to leveraging SignDoc as a standalone solution, you can also deploy it as part of the broader Kofax TotalAgility® platform. This unique platform creates end-to-end digital interactions with customers across a wide range of industries and use cases. Conventional, isolated solutions fail to facilitate synergies. SignDoc seamlessly integrates with mobile ID capture, as well as AI-driven document capture and transformation; workflow processing and management; and data via robotic process automation.

Signature-driven Workflows

Customer-engagement workflows are excellent examples of processes where companies can immediately benefit from e-signature and see even greater improvements through full workflow transformation.

Onboarding

Loan Processing

Claims Processing

Digital Consent
